COMMISSION

Case # 2007-00436

Ms. Beth O'Donnell,

I would like to protest the increase of the sewer rate. We have lived in Farmdale for 4 years now and this seems to be an ongoing issue. We are not satisfied with the quality of the water either. In the four years we have lived there we have received two letters stating that the water contains cancer causing agents and it states that the level are not high enough to effect us, however don't give this water to infants or elderly people. Also, if we were to drink this water over a 20-30 year period who is to say that it won't cause damage to my husband or me? We now have an infant and are out even more cost because we will not allow her to consume any of this water; therefore we buy bottled water to substitute. We ourselves have stopped drinking it too after the second letter. When I called to complain all I got was someone saying it was no concern, then why were the letters sent out? Our sewer already increased this past summer and I feel it is extremely high now I cannot imagine another increase. We just feel this is ridiculous and something needs to be done about the water and the extreme rising costs of the sewer.

Sincerely,

*Katrina Beckley*
